GSF_03-06_01	Move 64 BIT file IO definitions out of gsf_ft.h and into gsf.c and gsf_indx.c.	6/30/2014	Leidos	Redefintion of standard functions needs to move from gsf_ft.h into the gsf.c and gsf_index.c to avoid creating a conflict in the user application code external to the GSF library.	Required to avoid concflicts in code that uses GSF. Based on feedback received from Jan Depner.	None	
GSF_03-06_02	Resolved memory management problem with appending index files	6/30/2014	Leidos	Update the gsfAppendIndex function to resolve potential for memory problems when an existing index file is appended and the GSF file has numerous scale factor records.	Required to resolve long-standing bug. This issue is specific to appending a previously created index file for the case where there are numerous scale factor subrecords.	None
